

Well Child Check-Ups

Regular Check-Ups!!!

They're a Part of Every Child's Life

1. **Well-Baby** and **Well-Child** check-ups are important even when your child feels fine
2. Early treatment may help to keep health problems from becoming serious
3. Immunizations (shots that your child gets at the check-up visits) prevent illnesses that cause:
 - ♥ Pain
 - ♥ Fever
 - ♥ Coughs
 - ♥ Sore Throats
 - ♥ Hearing Loss
 - ♥ Blindness
 - ♥ Joint & Muscle Damage
 - ♥ Brain Damage
 - ♥ Death
4. Check-ups help to identify your child's needs and to make sure your child is getting all of the healthcare that is needed
